

Windows for a **better life**

THERMIA®
BARCELONA

Windows for a **better life**

“For us, **a window** is more than just a structure placed into a wall. For us, **a window** is **nothing less than an opportunity to live a better life.**”

“Looking from outside into an open window you never see as much as when you look through a closed window. There is nothing more profound, more mysterious, more pregnant, more insidious, more dazzling than a window lighted by a single candle. What you can see out in the sunlight is always less interesting than what goes on behind a window pane. In that black or luminous square life lives, life dreams, life suffers.”

Charles Baudelaire.

Our way of understanding what we do: **Thermia Barcelona's philosophy and approach.**

The human capabilities of Thermia Barcelona are what define us as a company. Without our team of involved and committed professionals, it would be very difficult to do what we do.

And this aspect, that of close involvement, is what we try to convey in our dealings with every client. Our commitment extends beyond the purchase of the product. We are committed to advising you, listening to you, and supporting you through every step of your project.

Windows for a better life

Thermia Barcelona®

One of our goals at Thermia Barcelona is to ensure that **you as a client can work with our product with full confidence in the quality, design and comfort** that the market demands; you need to feel that you partnered with a **responsible, professional team that will guide you and support you at all times.**

What does a window represent for Thermia Barcelona?

"We think of a window as something more than a structure placed into a wall.

For us, a window must go further; it must create spaces where there were none before; it must allow our home to be bathed in natural light; it must be airtight to protect us from cold and heat; it must provide us with

a silent environment; have a design that harmonizes with the rest of the architecture, and it must facilitate energy savings. A window should help create a more comfortable and functional home, with minimal effort on the part of the user.

For Thermia®, a window is nothing less than an oppor-

tunity for a better life. And that is why we need to produce a high-quality product.

A window of this excellence can only be created through an ingenious design system. In other words, all the elements that make up the window must have been studied and must be properly combined so that the

window fulfills the mission we have entrusted to it.

The technical area of Thermia Barcelona is constantly looking for ways to improve and fine-tune the system, in order to improve the features of each and every one of our windows."

Committed, professional, leading-edge, technically-minded, involved, transparent, curious, empathic, optimistic, sensitive. That is the approach that we take here at Thermia Barcelona.

Design
Comfort
Silence

The quality of Thermia® windows: a constant from start to finish.

In an increasingly demanding market, we must offer our clients an option with maximum assurance of certified quality.

All Thermia Barcelona® enclosure systems are designed and tested

in strict compliance with European market regulations, which require high performance in terms of airtightness, durability and performance in inclement weather, together with maximum energy savings.

Windows for a better life

Thermia Barcelona®

All Thermia® windows are manufactured by specially-trained professionals to ensure that every component of the window will work properly.

Thermia Barcelona Systems are extruded and assembled in accordance with ISO 9001 and tested under Standard EN 14351-1:2006.

The surface treatments have the QUALICOAT quality seal for lacquer, QUALIDECO for imitation wood lacquer, and QUALANOD for anodization.

In-house Technical Department

All Thermia® European window systems are developed in-house.

1. Better control and speed in implementing system improvements.

2. System adaptations for specific markets or even individual works.

3. Constant innovation to adapt our product to market changes.

QUALITY SEALS

All Thermia Barcelona® Systems are tested in laboratories approved to conduct air permeability, water tightness and wind resistance tests.

Bearings

Height-adjustable, nylon 6/6 + 30% fiberglass, turned and with single or double ball or needle wheels, depending on the weight borne (40, 80, 160, 200 kg.) F212 stainless steel cap and wheels, and anti-corrosive coating.

Folding handles

Manufactured under the ISO 9001 seal. Tested for 25,000 cycles with cast aluminum and AISI 430F stainless steel.

Sliding window multi-point closure

Manufactured under the ISO 9001 seal. Tested for 25,000 cycles.

CE tilt and turn

Manufactured under the ISO 9001 seal. Tested for 25,000 cycles up to 130 kg. Per leaf. Made of high-density zamac with an anti-corrosion treatment and AISI 430F stainless steel. Height and width adjustable +/- 1mm.

CE Projecting stay hinges

Manufactured under the ISO 9001 seal. Made of AISI 430 stainless steel. Tested for 25,000 cycles.

CE hinges

Manufactured under the ISO 9001 seal. Tested for 200,000 cycles. Capable of bearing loads of up to 70 kg. (2 hinges) and 90 kg. (3 hinges). Made of extruded aluminum and AISI 430F stainless steel.

CE door hinges

Manufactured under the ISO 9001 seal. Tested for 200,000 cycles. Capable of bearing loads of up to 90 kg. (2 hinges) and 110 kg. (3 hinges). Made of extruded aluminum and stainless steel.

Sealing and glazing gaskets

All made of top-quality EPDM rubber to maintain their properties over time and without deterioration caused by heat and cold, providing windows with a hermetic seal for years.

Weatherstripping

Manufactured with double or triple stitching. Provided with an integrated water-repellent textile film that acts as a barrier against the passage of air, water, and noise, allowing the panes to slide silently.

Corner joints

Made of cast aluminum and held with stainless steel screws, assuring protection against rust at the joints, where there the window is most exposed to water.

Surface treatments

Based on testing in neutral salt-spray chamber as per standard EN 1670: 2007 with classes 4 and 5.

Only the best accessory brands guarantee that windows will work properly and keep performing for a long time. This is why **Thermia Barcelona® windows are made exclusively with accessory brands manufactured in accordance with European standards.**

Every component of the window has undergone open-close cycle testing and corrosion measurement in a salt-spray chamber.

Design. Comfort. Silence.

Windows with a style of their own.

At Thermia Barcelona®, we understand the importance of design in the architectural world, and that's why we offer today's most sought-after colors and finishes at the best price. So that you can add that special touch to your projects.

Profile surfaces are treated to ensure long-lasting windows. Every treatment has a quality seal, meaning that every Thermia window manufactured or sold to your clients is synonymous with reliability and durability.

Windows for a better life

Thermia® Shutter Series
with 4 kinds of slats and glass.

Thermia® PM

Sun & sight protection and security series

Fixed slat shutter

The solution for sun protection and ventilation, protecting the privacy of guests.

Blind slat shutter

The solution for achieving a totally opaque and reinforced surface. Allows no light to enter.

Movable slats shutter

Slat position can be adjusted, allowing the user to position them as desired at any time.

Glass slide & folding

Commonly used with exterior and interior folding closures, for dividing interior space.

Mediterranean style
Thermia® Shutter

The Thermia® shutter takes its inspiration from the ancient wooden shutters that adorn many buildings in cities and towns throughout the Mediterranean area.

More than a simple decorative facade, it offers ideal protection against the sun's rays as well as home burglaries.

Its extruded aluminum construction is perfect for achieving a stronger, longer-lasting and maintenance-free product.

The huge variety of solutions offered in this series allows you to choose the best option for any construction style.

Design

Thermia® PM

Sun & sight protection and security series

Opening systems

Sliding shutter system

- The sliding shutter is the perfect solution for sun protection on the facade of a building. Its lateral movement allows for the fabrication of 1, 2, or more panels, with multiple trucks.
- The wall guide is manufactured with a decorative cover for a more elegant look.
- The ability to slide all the panes laterally means that the window opening can be left completely unobstructed.

Single panel Double panel

Wall guide with decorative cover Cross-section single panel Overlapping lower guide Embedded lower guide

Folding shutter system

- The ideal closure for restaurants, bars, pool areas, meeting rooms, etc.
- Either glass or slats can be mounted in its frames.
- Multiple combinations (Fig. 1)

(Fig. 1)

Recessed lower guide Overlapping lower guide Upper ceiling guide

Windows for a better life

Caseament shutter system

- The frame rotates to an open position on a vertical axis, using hinges.
- Allows for up to 4 panels to be installed, with different opening solutions.
- Combinations (Fig. 2)
- The panes can open to the outside or the inside, as needed.

(Fig. 2)

Cross-section single panel

Cross-section double panel

The aluminum shutter serie is ideal for:

- Decoration of the facade.
- Greater protection against robbery.
- Solar protection in buildings and residences.

Thermia® MQ22

Mosquitoes screen

Insect protection series

A versatile system offering effective protection against mosquitoes.

- + Casement, sliding, or fixed structure opening systems.
- + Manufactured with 1, 2, 3 or more panels.
- + Manufacture of large-format balcony doors.

Windows for a better life

A **unique system** in the market for **large-format balcony doors.**

Thanks to the use of robust profiles and the assembly system, large-format panels can be assembled with whatever combination works best.

While other products on the market have a very short useful life, The Thermia MQ22 mosquito screen has been specially designed to last a long time in large openings.

Protection against insects.

Thermia® MQ22

MOSQUITO PROTECTION / Thermia® MQ22

Maximum robustness

A system of tubular profiles joined by machined corner joints on the profile and robust, high-quality components to ensure a long useful life.

Impeccable aesthetics

Unlike most mosquito screen system sold on the market, Thermia® MQ22 uses aluminum corner joints on tubular profiles to create frames and sash joined at 45° (like a window), avoiding flimsy plastic components that deteriorate quickly.

Easy to manufacture and install

Highly intuitive manufacture and installation All you need are the same fixtures and accessories used with the Thermia Barcelona® windows series.

100% Adaptable

This series is fully adaptable to the Thermia Series and to any other window on the market.

Thermia® AF52M Mullion

Light structural series

Technical features Thermia® AF52M - Mullion
Compatible with the Thermia® AF52 series, an upright and crossbeam system measuring 85 mm and 125 mm.
Glass panes supported mechanically by the moldings of the Thermia system.
Wide range of glazing.
Ability to mount outward-opening sash from the AF52 series.
Ability to attach any sliding or casement window from the Thermia system to the uprights.
Option of internal steel reinforcement to increase strength (ExY module).
Many combinations can be achieved by attaching a screw-on blades or glazing bead in multiple positions.

Inertias

Non-reinforced Reinforced

Manufacture Thermia® Windows anywhere in the world.

Our Thermia® systems distribution division serves window manufacturers, offering the following advantages to metal carpentry workers:

Comprehensive service to manufacturers

- + Optimization of inventory of Thermia® profiles and accessories.
- + Specific tools for optimal manufacture of Thermia® window.
- + Specialized carpentry software, customized for your use.
- + Start-up and after-sale service.
- + Comprehensive logistics service and tracking of goods.
- + Ongoing training in the manufacture of Thermia® system.
- + Corporate communication and marketing support.
- + Ongoing technical and business consulting.

Thermia® window manufacturers benefit from optimized inventory management, personalized technical support and business consulting for all Thermia® systems.

“We offer a comprehensive, fully customized service”

The Thermia® systems distribution network

- + Marketing to **domestic manufacturers.**
- + Marketing to **international manufacturers.**

Windows for a better life

Manufacture or install Thermia® anywhere in the world

Install Thermia® windows.

Comprehensive service to installers:

- + Ongoing technical and business consulting.
- + Fast delivery service.
- + Comprehensive logistics service and tracking of goods.
- + Corporate communication and marketing support.

Our manufactured window division allows window installers to purchase Thermia® doors and windows with whatever technical and aesthetic features they need.

Trained professionals in Thermia® windows manufacture, will create whatever closures are requested **under CE regulations.**

In order to guarantee quality, Thermia® closures undergo thorough quality control for:

- Functionality of components.
- The airtightness of the system.
- Surface finishes.

Wholesale Thermia® windows manufacturers:

Service to all companies in the construction, architecture, and remodeling industries:

Design
Comfort
Silence

Windows that measure up to the latest environmental trends: energy efficiency.

Less energy use, more comfort.

The maximum thermal insulation of a building is directly related to the resistance capacity of the elements that are in contact with the outside environment: windows

doors, exterior walls and roofs. To achieve optimal energy efficiency, suitable insulating materials must be installed on the building envelope.

Windows for a better life

A well-insulated house can save up to 50% on energy consumption.

Windows and energy efficiency

The windows are the most vulnerable part of a residence.

As part of the fight against energy waste and worldwide CO2 emissions, European authorities connected to the construction industry have established strict and mandatory directives on energy efficiency, which must be applied to buildings and which are found in the Basic Energy Saving Document (DB HE) as an extension to the current Technical Building Code (CTE).

This new legal framework affects both new construction and existing buildings in the process of being sold or leased.

At Thermia Barcelona® **thermal insulation is one of the highest priority goals** in the design and manufacture of doors and windows. We know that controlling the temperature and humidity inside homes is key to providing the comfort and well-being that we all want.

Design
Comfort
Silence

How the noise pollution affect our health and comfort and how insulated windows can help us.

Noise pollution is an affliction that affects everyone who lives in major cities. The noise of cars and motorbikes, helicopters and planes remain excessive and annoying sounds that we continue to hear and which affect our health on a daily basis.

In fact, traffic is the main source of noise pollution. A constant sound that hardly ever stops seems to envelop everywhere we go (work, walking around town, the home, etc.)

If you live near to a road with traffic, sleeping or simply the peace of mind of being at home can be a difficult task and often an irritating one.

Being able to rest at home should be routine, but that is not the case for many millions of people.

And then there is sleep. Getting a good night's sleep can become a nightmare if noise penetrates our entire room. And getting the recommended sleeping hours is vital for our well-being and health.

The WHO (World Health Organization) establishes the maximum levels at 50 dB-60 dB (decibels) and warns that higher exposure can be seriously harmful.

As an example, the noise of a vacuum cleaner is already at 65 dB, a normal conversation is 50 dB and rustling of leaves is 20 dB. It is important to try to lower the decibels in our homes to guarantee a more peaceful house, places to rest and to alleviate tension accumulated during the day. Ultimately, our home is our temple. Shouldn't it be a place of rest and happiness?

Windows for a better life

According to the WHO (World Health Organization) it establishes the **maximum levels at 50-60 dB (decibels)** and warns that higher exposure can be seriously harmful to our health.

Psychological health specialists state that peacefully benefiting from sleep time translates to greater effectiveness on a work and emotional level.

Noise-related illnesses include hearing loss, learning problems, strokes, respiratory diseases, stress and irritability or neurosis, hysteria and psychosis.

Regardless of the government campaigns to draw up action plans to control and prevent sound contamination in streets and common areas, the fact is that people currently continue to endure pollution damage on a daily basis.

It is not possible to halt the consequences of these pollution indices in public areas in the short term, but we can in our homes.

If we can insulate our home against the constant outside noise, we will be able to im-

prove the quality of our lives, increase our comfort and, above all, ensure that our health is protected.

One of the best options for living with peace and quiet at home is insulated (thermo-acoustic) windows that protect on the one hand against outside noise, and on the other against the cold and heat depending on the time of year.

Design
Comfort
Silence

Windows for a better life

The importance of glass in acoustic attenuation.

Studying the phonic performance of a window, we can find the factors that determine the effectiveness of acoustic attenuation:

Tempered or laminated glass (not acoustic) do not alter the acoustic properties.

However, acoustic laminated glass attenuates more than the same thickness of float glass.

The window must guarantee the maximum possible air-tightness.

Any minor crack in the closure represents an air inlet and, therefore, noise.

Different thicknesses of insulated glass attenuate more than insulated glass with the same thickness.

The thicker the glass, the greater the attenuation.

It is advisable to fit thicker glass, keeping in mind its weight (2.5 kg per m² and mm of thickness).

The **solution** at home: **Installing airtight windows** that insulate against the outdoors.

Thermia Barcelona® thermo-acoustic windows offer high acoustic and thermal insulation in homes. They feature high airtightness, ideal for combating noise issues, dust and changes in temperature.

 SILVER STOCK
 SUITABLE FOR CURVE

TWO-COLOUR STOCK AVAILABLE
 * UNFINISHED UPON REQUEST
 ** UNFINISHED UPON REQUEST WITH MINIMUM (see number of bars).

NB MATTE BLACK
 Unfinished available in all profiles except those marked with * or **

Minimum measurements for curved profiles:
 ⊙ Minimum radius of window frame AF52 / AR52 / AR62: 650
 ⊙ Minimum radius of window frame AR78+ : 600 mm
 ⊙ Minimum radius of door frame for all series: 900 mm
 ⊙ Minimum radius of window frame OC78+ : 750 mm

Acoustic properties of glazed windows

Simplified calculation according to standard EN-UNE 14351-1:2006

Valid according to the Technical Building Code Catalog of Construction Components

Annotations:

- C Spectral adaptation term of the sound reduction index for incident pink noise, in dB.
 C_{tr} Spectral adaptation term of the sound reduction index for automobile noise, in dB.
 RA Global sound reduction index, A weighted, in dBA.
 RA_{tr} Global sound reduction index, A weighted, for automobile noise, in dBA.
 R_w Global sound reduction index, in dB.

ACOUSTIC INSULATION VALUES FOR WINDOWS with a surface area of up to 2.7 m ²												
Composition		THERMIA® Series										
		CF31 / CF40 / CR31 / CR40 / CR46 / ER52					AF52 / AR52 / AR62 / AR78+					
Type	Thickness (mm)	R _w (dB)	C (dB)	C _{tr} (dB)	RA (dBA)	RA _{tr} (dBA)	R _w (dB)	C (dB)	C _{tr} (dB)	RA (dBA)	RA _{tr} (dBA)	
Plain glass	6	28	-1	-1	27	27	31	-2	-3	29	28	
	8	29	-1	-2	28	27	32	-2	-3	30	29
