

Thermia® PM40 DECOR

Shadows as construction elements

- + Decoration for interior and exterior (interior divider).
- + It is a construction element that lends projects character and distinction.
- + Also can be used for sun control and protection.
- + Durable and functional aluminum system.
- + It shares components with the Thermia MALLORQUINA® shutter system. In other words, it is **manufactured with the same profiles and fittings**.

Aluminum solution for architectural decorations and sun control.

Thermia® PM40 DECOR can be used to cover the system's leaves using items such as:

- + Square or rectangular tubes of any material (aluminum, wood, stainless steel, PVC, etc.) No greater than 30 cm in width.
- + Expanded metal sheet.
- + Perforated, braided, or free-design sheets.
- + Frameworks.
