

THERMIA PM40 DECOR

Aluminum solution for architectural
decorations and sun control.

THERMIA[®]
B A R C E L O N A

Windows for a **better life**

“Architecture is the
encounter of light
and shape.”

Le Corbusier, architect.

Shadows as construction elements

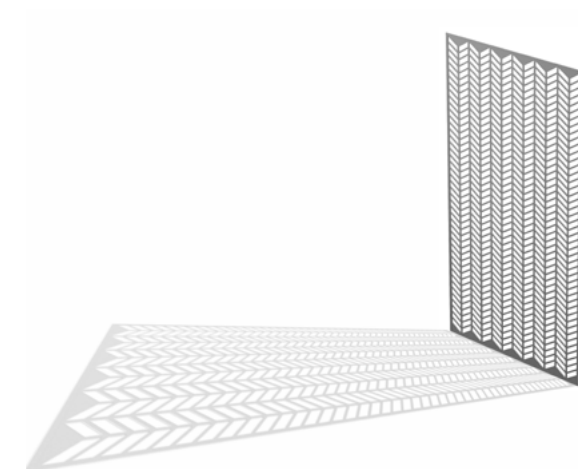

There can be no shadows without light and there can be no volume, depth or dimension without shadows.

Natural light fills us with warmth and delight, acting as an invisible thread connecting us to life. The way it makes us feel is simply impossible for artificial light to replicate.

Its benefits stretch beyond the field of energy, contributing to our health and safety while helping to fill our bodies with this magical element.

Among other things, the new **Thermia PM DECOR** sun control series is a tool for designing light and dark patterns, densities and volumes inside and outside a building.

When light encounters shape.

The possibilities
with this **system**

Thermia PM40 DECOR

is an aluminum solution for architectural decorations and sun control featuring all the benefits of a mobile system.

Thermia PM40 DECOR® - Sliding Windows

This solution is designed to provide indoor and outdoor decorative style.

As a construction element it brings character and sets architectural designs apart while providing shade from the sun.

This system is guaranteed to last long thanks to the natural performance of aluminum.

With the Thermia PM40 DECOR system, we can work with mobile structures no matter what design we choose.

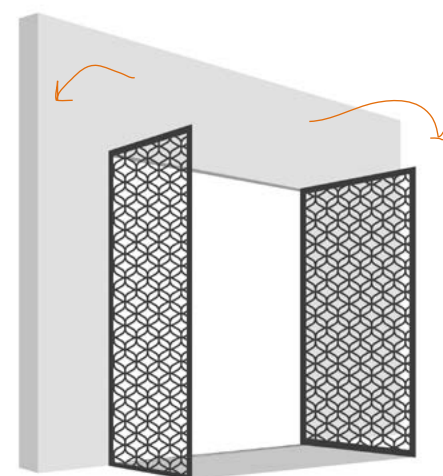

Thermia PM40 DECOR features the exact same components as the Thermia SHUTTER system. In other words, it is manufactured with the same profiles and fittings.

The result is functional aluminum structures and the possibility of making mobile panes according to the needs of the project.

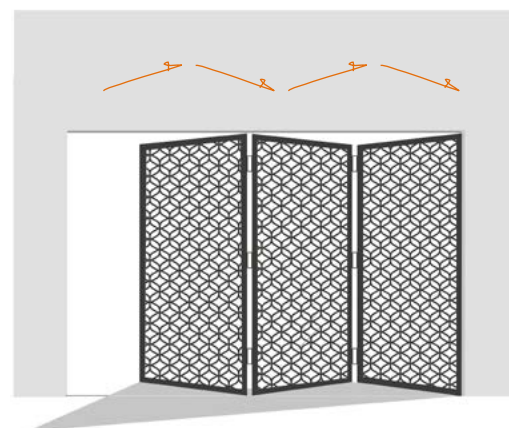

Thermia SHUTTER - Folding

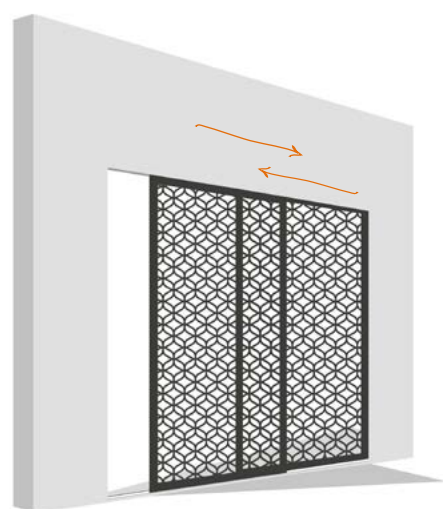

Versatile opening system.

Casement system

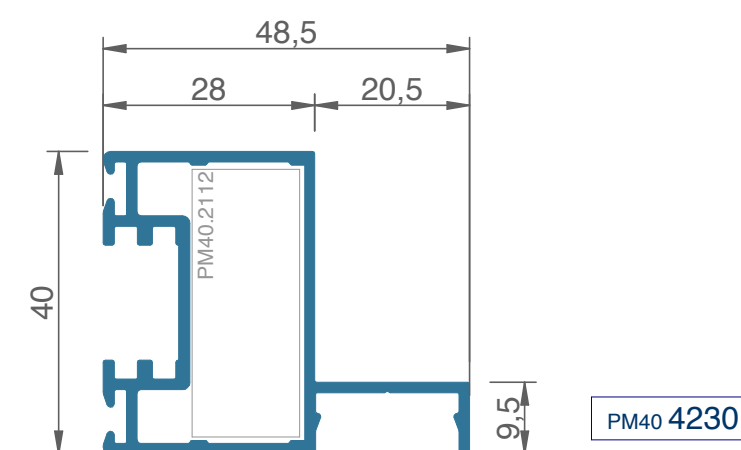

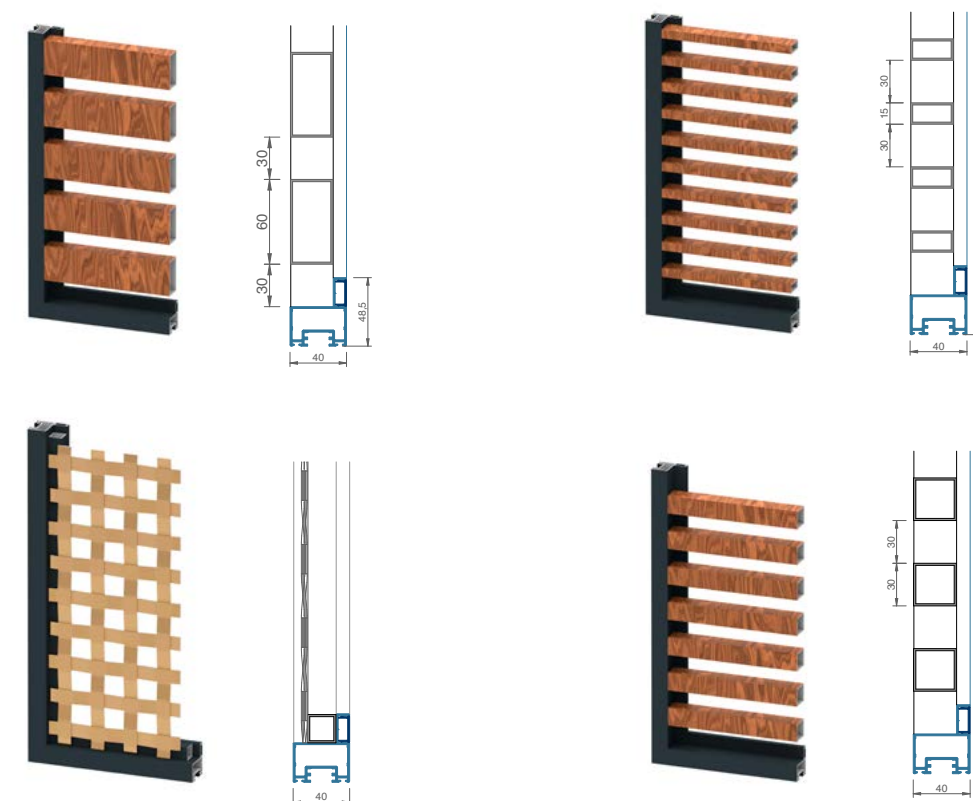

Folding system

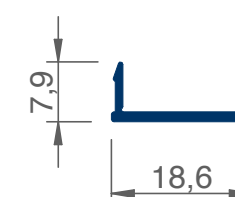

Sliding system

You can **choose what type of opening system** you would like to meet your project's needs.

Cross-sections.

PM40 4230

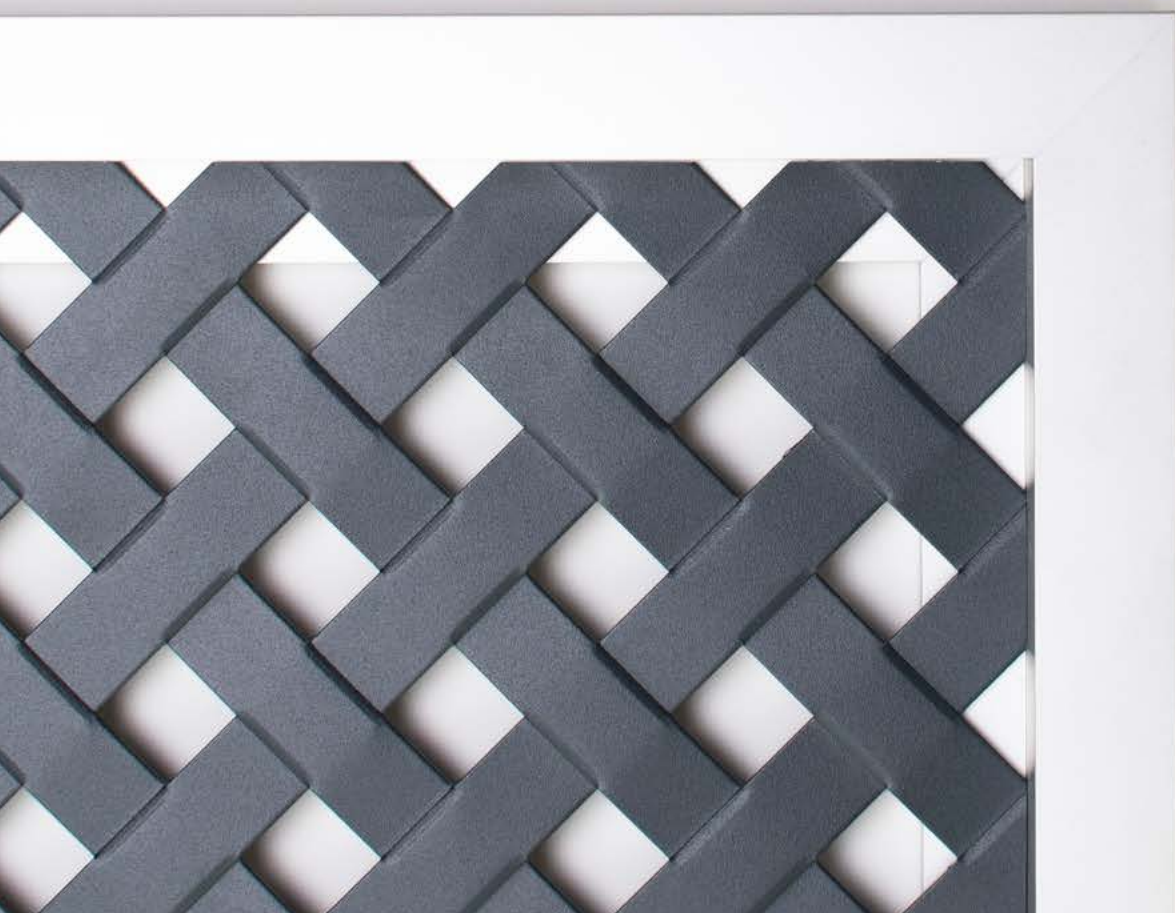

PM40 4231

Design.

The **PM40 DECOR® system** enables various materials, shapes and sections to be coupled to the panes to produce any design.

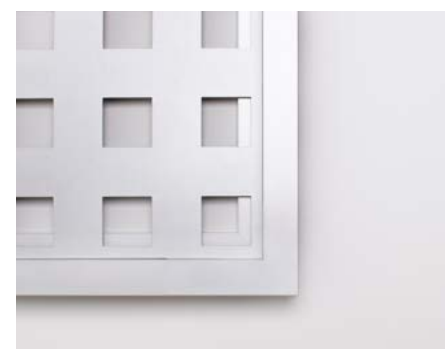

*Your imagination is the limit.**

aluminum frame with a matte
silver finish and a RAL 7016
textured aluminum screen

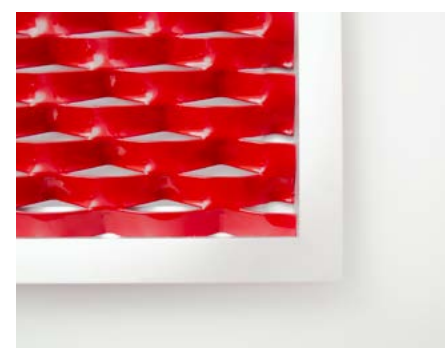

Braided sheet

Perforated sheet

Rectangular wooden strips

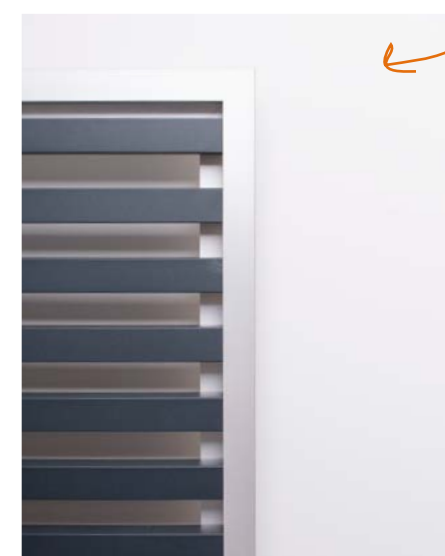

Expanded sheet

* PLEASE NOTE: Our engineering department will provide you with advice on the maximum pane dimensions for each model and the thicknesses of the sheets to use for each one.

- + Square, rectangular or cylindrical tubes made of any material (aluminum, wood, stainless steel, PVC, etc.)*

*No greater than 30 cm in width.

- + Expanded metal sheet.
- + Perforated, braided, or free-design sheets.
- + Wooden strips.

Rectangular aluminum tubes

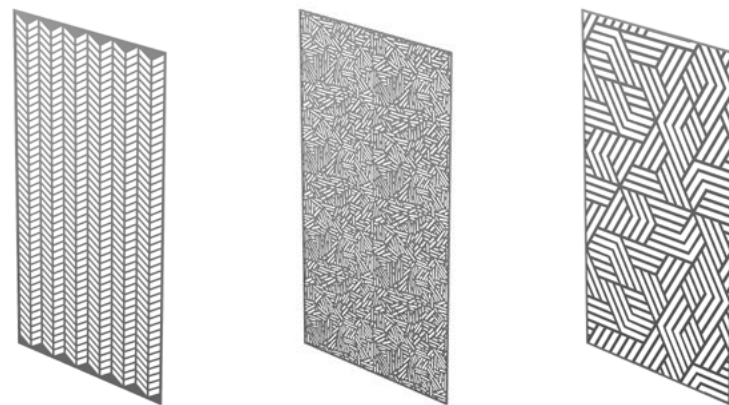

Cylindrical wooden tubes

ALUMINUM WITH A
WOOD FINISH is a real plus.

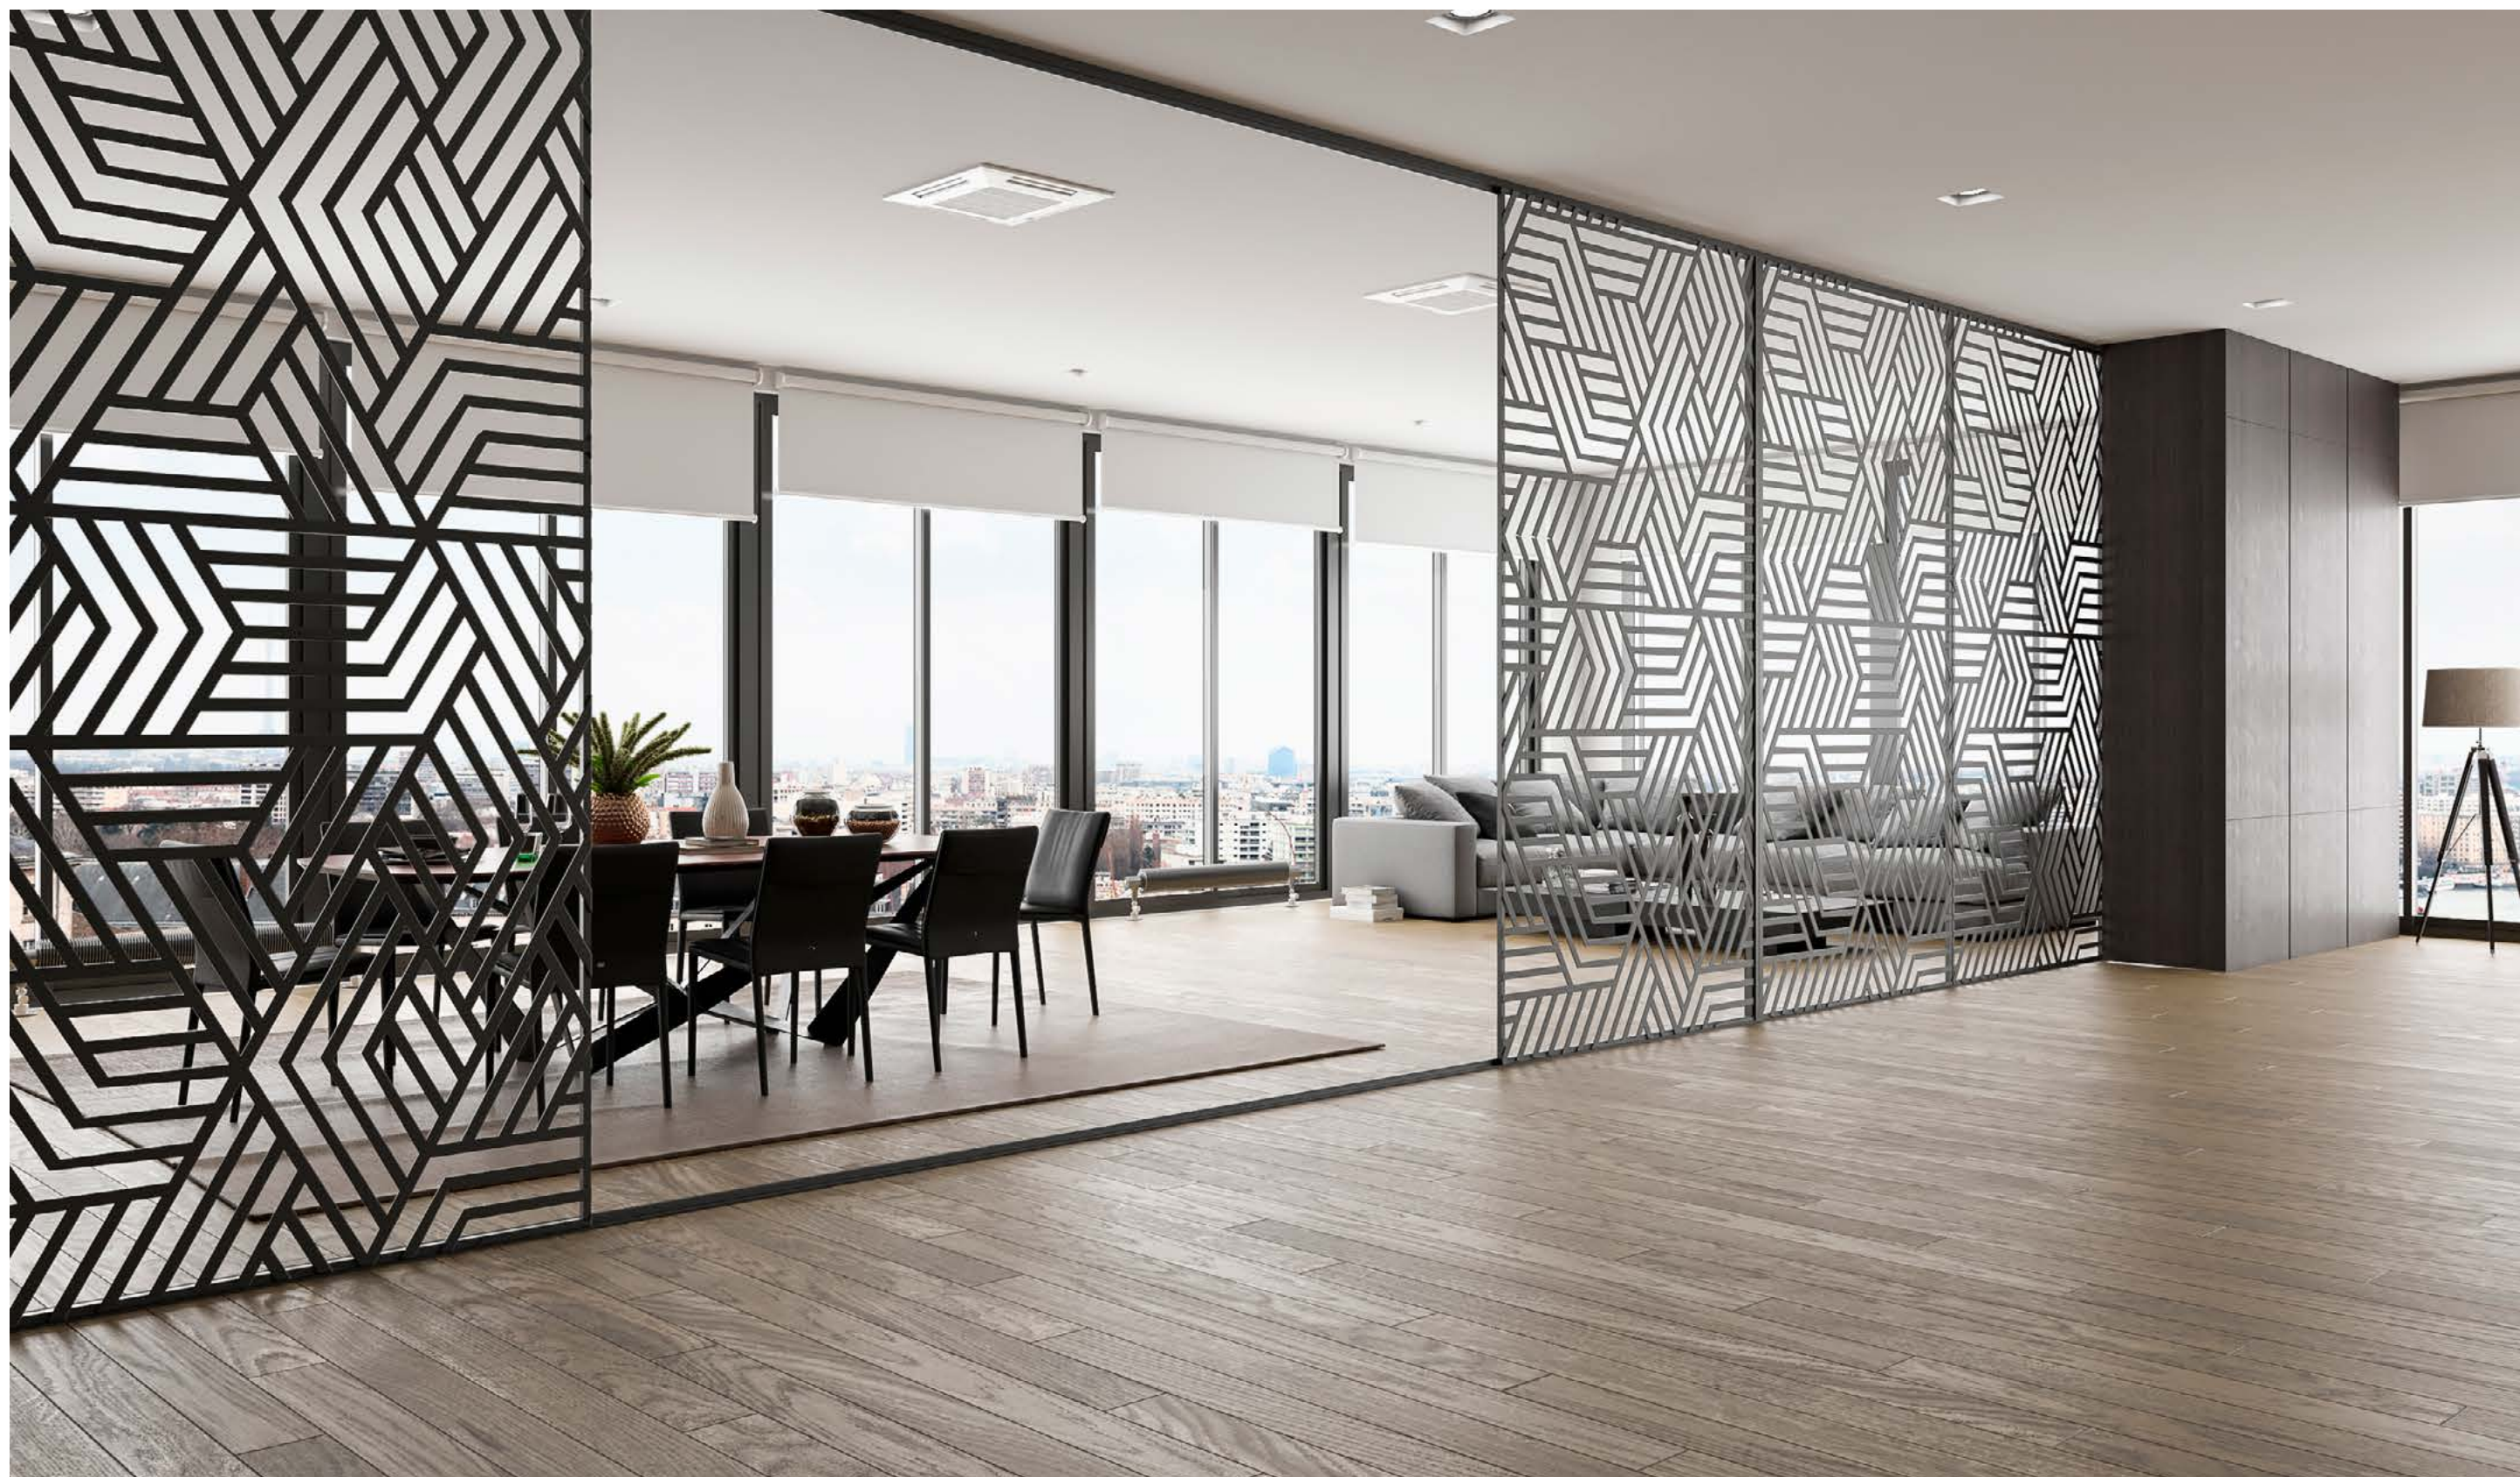

Employ aluminum with a wood finish for a completely natural look, and forget about maintenance.
