

Decorative panels

Entrance doors

Design
Comfort
Silence

It all starts *here.*

The front door is what sets the stage for our home, offering a first impression about style and who we are.

Decorating our homes with custom shapes and designs is a way of expressing ourselves. Making it fit our style makes us feel more comfortable and cozy.

The front door is another architectural feature to consider. Being able to make it fit your taste and requirements is exactly what we offer.

“Some people look for beautiful places. Other people make places beautiful.”

Basic information

Composition of all panels

Two lacquered aluminum sheets on each side with an interior composed of marine plywood and a thermal-acoustic insulator.

- Aluminum sheets: 1.5 mm
- Marine plywood core: 15 mm
- Thermal-acoustic insulator: 5 mm

Note: The panels are always manufactured with the thermal-acoustic insulator on the exterior side.
*Possibility of high-density extruded polystyrene.

Standard panel dimensions

If the customer does not specify otherwise, the panels will be delivered with the following characteristics:

Panel dimensions:

- 800 mm width x 2000 mm height x 23 mm thickness

Glass composition:

- 8+8 Lam. mat

Other available features:

- Maximum panel thickness: 49 mm
- Maximum panel width: 1120 mm
- Maximum panel height: 2500 mm
- Laminated glass chamber available for panels with a width of 28 mm to 49 mm

Opaque and glassed panels

Default design: 2-sided. Possibility of 1-sided design upon customer request.

Stainless embellishments panels

Default design: 1-sided. Possibility of 2-sided design upon customer request.

BENEFITS

Reinforced panels and laminated matte glass

Highly soundproof

Highly heatproof

Easy to clean and maintain

Custom size, shape and color (RAL® color chart)
